## About Me

A detail-oriented and highly motivated BSCS graduate with an established programming and technology background. Experienced in full stack or ai model training or oracle data base project or programming skilled and crafting cutting-edge solutions. Ready to apply technical creativity to achieve organizational goals.

## Skills

- Management Skills
- Front-End & Back-End Development
- Data handling
- Problem solving
- Critical Thinking
- Leadership
- Programing

## Education

- Bachelor of Computer Scince  
*University of management and technology, Lahore* 2025
- Ics Computer Science  
*Aspire College herbans pura Mughalpura Lahore.* 2021
- Matric-Computer Science  
*Pak Grammar High School Lahore.* 2019

## Experience

- Six-month internship in DAR-E-ARQAM SCHOOL.  
Data and networking management.  
Data synchronization and recovery  
Clouding Computing
- Fyp (final year Project)  
*mern stack*  
This project is designed for use by a car-pooling company that specializes in providing carpooling services to customers which is coast effective, time effective and reduce congestion. It is an online peer to peer system that allows customers to browse available cars, register their profiles, and book cars or create pools for ride sharing with others.
  - mongo db
  - express js
  - react js
  - node js
- Ai Project(face age detector)  
*model training and data collection*  
AI Age detection web app based on face detection using yolo model. Which detect user age  
By analyzing their features of face like (skin texture or wrinkles or droopy cheeks and eyelids).  
This will work on yolo model which advancement of deep learning and computer vision.  
This will be train given dataset then it can be predicted user image by specific age group like young or child or middle or old etc.  
There are many key steps to accomplish this project like data collection, splitting this data and testing or training data etc.
- Data base Project  
*Car Rental system*  
create this project usng sql including deferent quires like Concatenate relations etc
